Professional Summary

Computer Science Engineering student graduating in 2027 with hands-on experience in Python-based software and AI/ML applications. Skilled in Python, DSA, machine learning, backend development, and API integration. Developed applications using Flask, FastAPI, YOLOv11, PyTorch, Flutter, and SQLite. Seeking an entry-level Software Developer role.

Education

B.E. in Computer Science and Engineering, *SDM Institute of Technology, Ujire* 2027
CGPA: 6.1

Technical Skills

Programming

Python, Java (Basic)

Machine Learning

Scikit-learn, Random Forest

Computer Vision

YOLOv11, Ultralytics, PyTorch

Backend & APIs

Flask, FastAPI, REST API, WebSockets, Uvicorn

Database

SQLite

Frontend & Mobile

HTML, CSS, JavaScript, Flutter, Dart

Core & Tools

DSA, SQL (Basic), Git, GitHub

Projects

AI Disaster Risk Prediction & Early Warning Assistant

- Built a Random Forest ML application to classify Flood, Cyclone, Wildfire, and No Significant Risk using 8 environmental features.
- Built a Flask web app with HTML/CSS/JavaScript and integrated OpenWeatherMap API and SQLite for prediction-history storage.
- Technologies: Python, Scikit-learn, Random Forest, Flask, HTML, CSS, JavaScript, OpenWeatherMap API, SQLite, Git/GitHub.

Blind Assistance Object Detection & Navigation

- Developed a Flutter assistive navigation app with FastAPI backend and YOLOv11/PyTorch for real-time object detection.
- Implemented direction estimation, WebSocket communication, priority-based voice guidance, TTS, and speech-to-text.
- Technologies: Python, FastAPI, YOLOv11, Ultralytics, PyTorch, Flutter, Dart, WebSockets, REST API, Uvicorn, Git/GitHub.

Certifications

- NPTEL – Soft Skill Development
- Infosys Springboard – Java Programming Fundamentals
- Infosys Springboard – Machine Learning Workshop
